SUMMARY

Business Intelligence Engineer building scalable analytics systems for executive and global operations. Experienced in architecting governed semantic layers, production ETL pipelines, and data observability frameworks that enable reliable self-service reporting and strategic decision-making at scale.

CORE SKILLS

BI & Data Architecture

Advanced SQL | Dimensional Modeling | Semantic Layer Design | KPI Governance | ETL/ELT | Data SLAs

Analytics & Reporting

QuickSight | Tableau | WBR/MBR/QBR | Cohort & Trend Analysis | Business Narrative Development

Cloud & Engineering

AWS (S3, Glue, Redshift, Spectrum) | Data Warehousing | Query Optimization | Pipeline Monitoring | Data Quality Controls

PROFESSIONAL EXPERIENCE

Business Intelligence Engineer

Jun 2024 - Feb 2026

Amazon, Seattle, WA

- **Designed and developed a global executive dashboard** consolidating 30+ shipping, packaging, revenue, and environmental metrics across five regions (APAC, EU, MENA, AMER, LATAM); partnered with 5+ international analytics teams to standardize and automate 7+ ETL pipelines, defined SLAs and schema contracts for 10+ datasets, and reduced quarterly business review preparation time from 40 hours to 30 minutes while ensuring consistent, reliable data.
- **Designed and launched a mobile-first CEO Insights dashboard for Amazon Sustainability leadership and the S-Team**, partnering with Finance, Product, and Directors to automate carbon reporting through a multi-layered ETL architecture (RAW and reporting layers), 9 materialized views, and a self-service S3 ingestion framework (2-3 minute processing); enabled timely executive visibility and proactive course correction toward Net-Zero 2040 goals.
- **Led digital engagement analytics for Amazon's external platform, Sustainability Exchange**, building 5+ production ETL pipelines powering web analytics, customer satisfaction, user journey, and anomaly detection dashboards; identified underperforming marketing channels, reducing quarterly spend by \$30K+ and increasing year-over-year awareness by 50%.
- **Architected data pipeline monitoring frameworks**, implementing data-lag alarms and automated error detection to meet a 1-day data freshness SLA; built z-score-based anomaly detection using 12-week rolling baselines across 6+ operational web metrics, accelerating root-cause identification and enabling proactive response to performance shifts.
- **Designed and implemented a Data Quality & SLA Escalation framework**, establishing severity tiers (Sev 2-4), defined acknowledgment and resolution SLAs, and RACI ownership; reduced mean time to resolution by 85% (14 -> 2 days), strengthening cross-team accountability and incident governance.
- **Delivered monthly deep-dive performance analyses** (trend, cohort, contribution, baseline deviation, anomaly detection) to surface key drivers and inform strategic decisions for senior leadership and product partners; identified gaps in the platform's permission model, influencing a shift from open access to governed, role-based controls.
- **Migrated 5+ legacy Tableau dashboards to Amazon QuickSight**, implementing Row-Level Security (RLS) for 6,000+ users to ensure governed, role-based access; improved dashboard performance, strengthened data validation controls, and preserved calculation integrity across enterprise reporting.

Business Analyst Intern

Oct 2023 - Mar 2024

Amazon, Seattle, WA

- Partnered with PMs to translate customer sentiment and engagement needs into measurable KPIs, analyses, and dashboard requirements across multiple products.
- Produced recurring SQL-driven insights for Monthly/Quarterly Business Reviews narratives (engagement, response rates, CSAT trends) and improved reporting consistency through Tableau and QuickSight best-practice documentation.

EDUCATION

Western Governors University <i>B.S. Software Engineering</i>	Aug 2025 - Expected 2028
Year Up / Seattle Central College <i>Technical Training Program</i>	Mar 2023 - Mar 2024

CERTIFICATIONS

AWS Certified Cloud Practitioner	Sep 2023 - Sep 2026
SQL Certification	Nov 2023
Java Basics	Sep 2021

ADDITIONAL EXPERIENCE

Bookkeeper Palma Trucking LLC, Seattle, WA	Feb 2022 – Feb 2023
Amazon Flex Driver Amazon Logistics, Seattle, WA	Jul 2022 – Oct 2023
